

# Plat Monitoring Program

2022 Program Report

June 20, 2023

# How data and policy relate

# Background

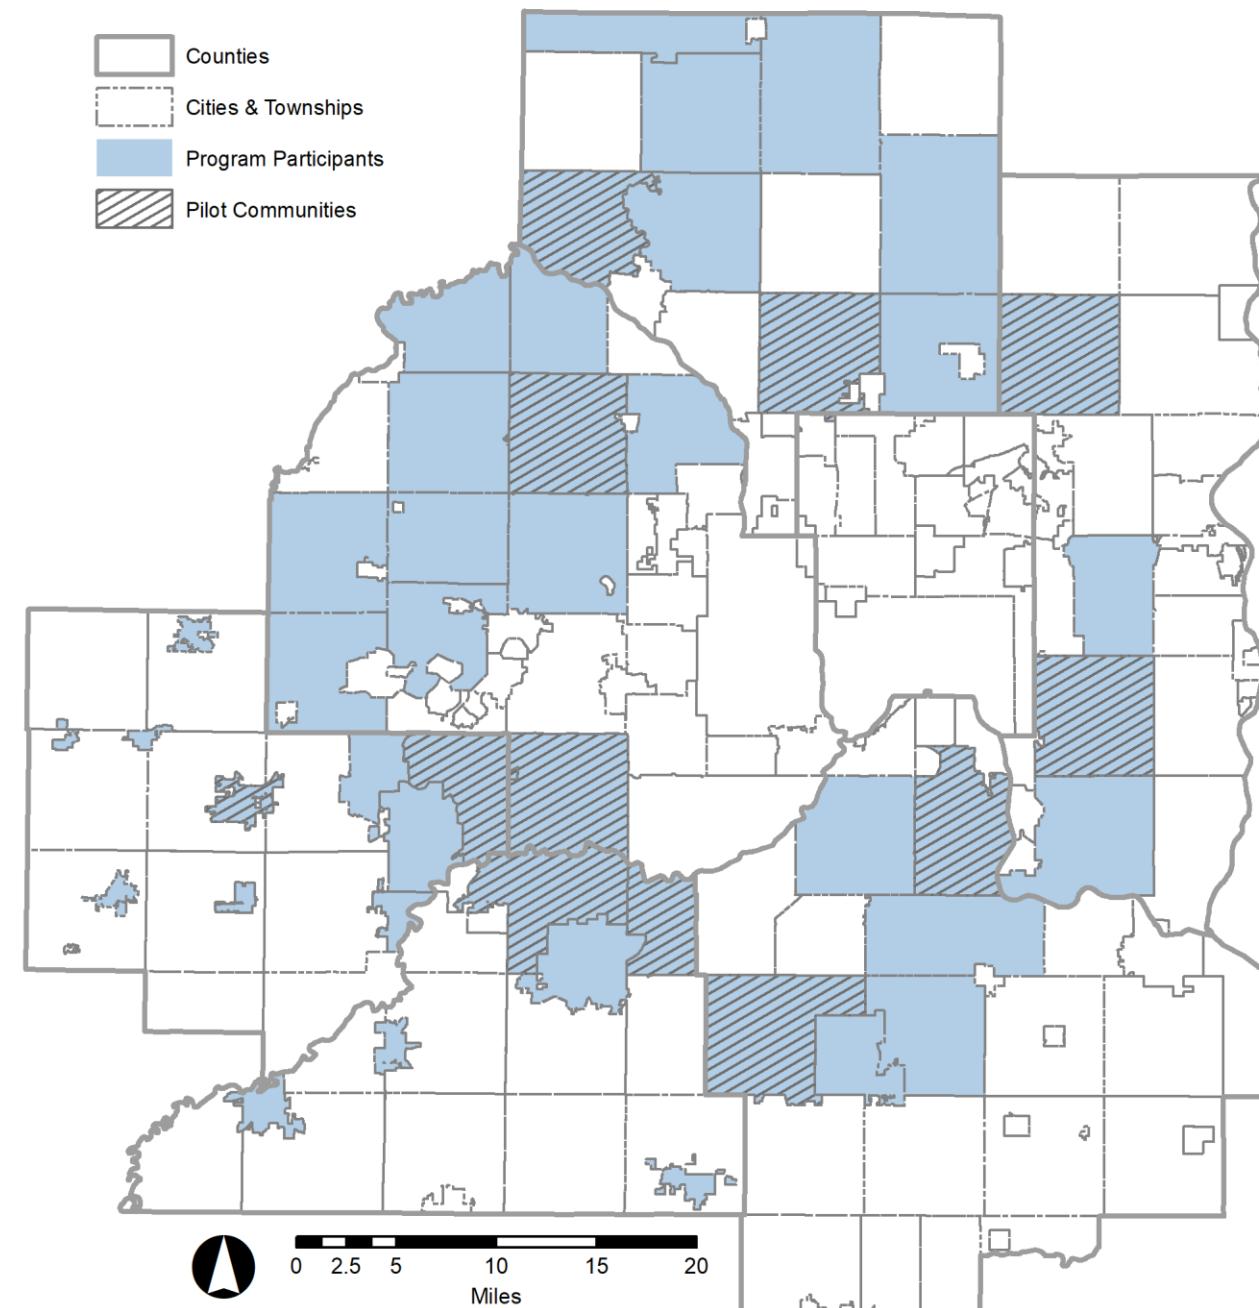

- Program started in 2001
- Objectives
  - Measure Council policy success
  - Track sewered residential developments
  - Assess the availability of land supply
  - Monitor overall net density of development

# Participating Communities

## Pilot Communities

- Blaine
- Chanhassen
- Eden Prairie
- Hugo
- Inver Grove Heights
- Lakeville
- Maple Grove
- Ramsey
- Savage
- Shakopee
- Waconia
- Woodbury

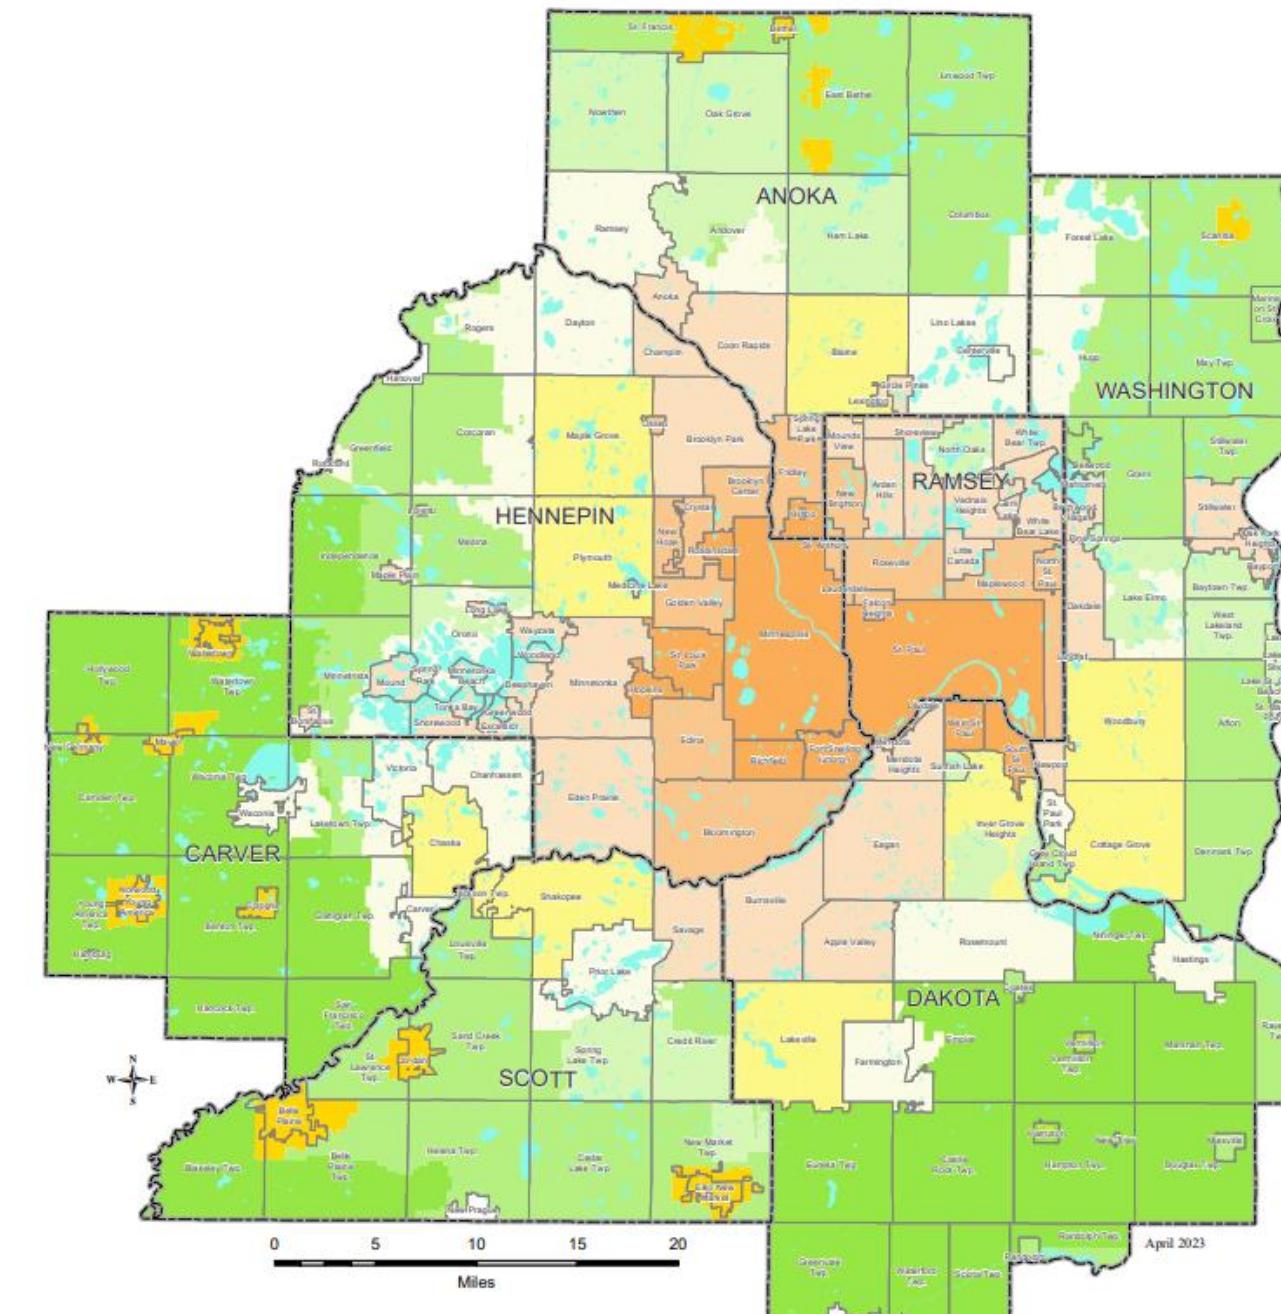

# Community Designations

## **Urban Service Areas**

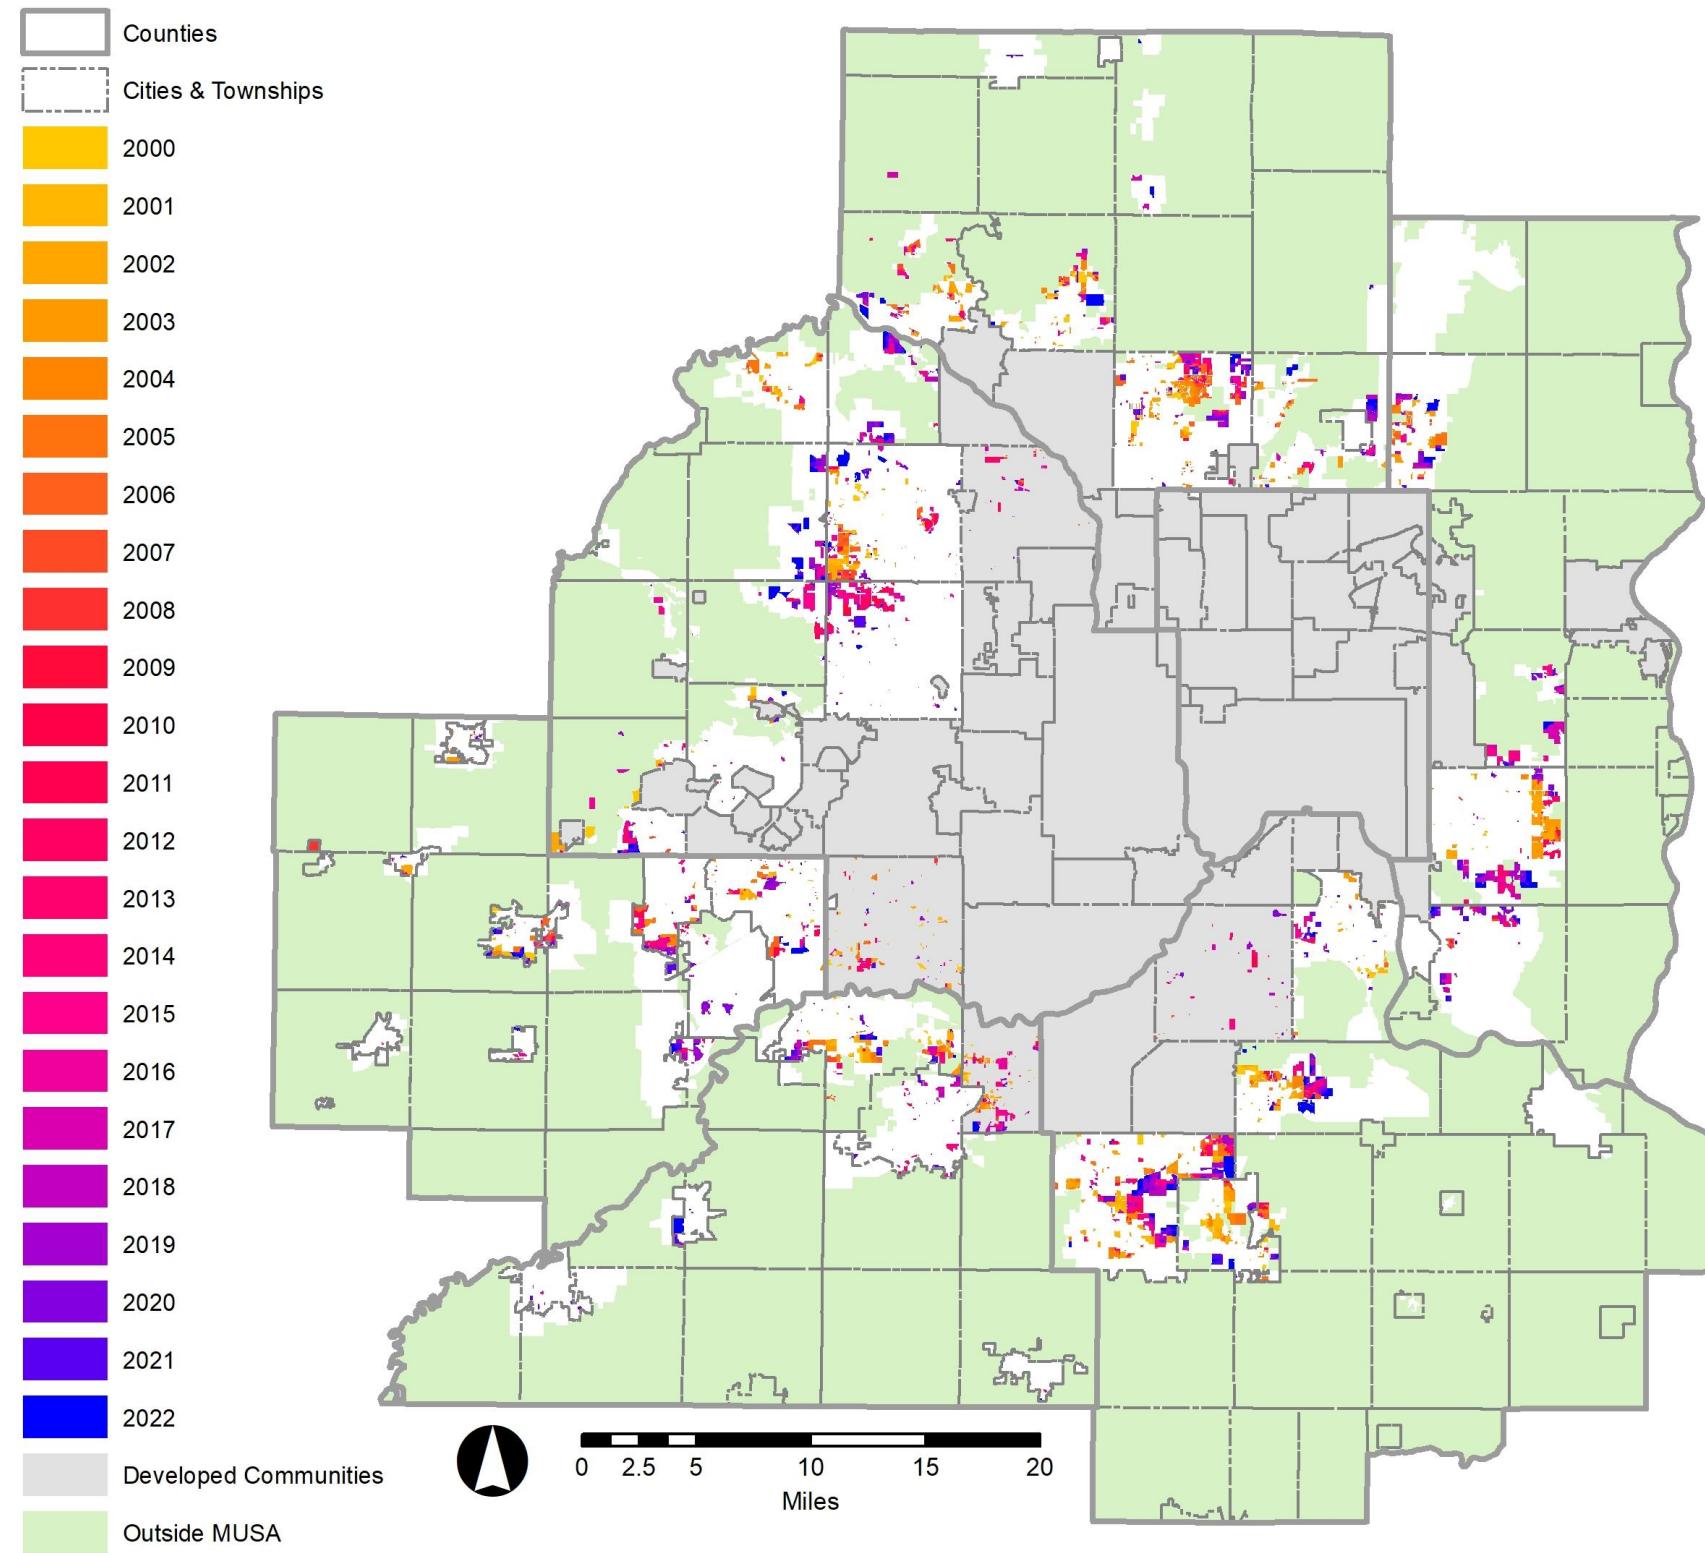

- The legend consists of five color-coded squares with corresponding labels: an orange square for 'Urban Center', a light orange square for 'Urban', a pale yellow square for 'Suburban', a bright yellow square for 'Suburban Edge', and a light green square for 'Emerging Suburban Edge'.

## Rural Service Areas

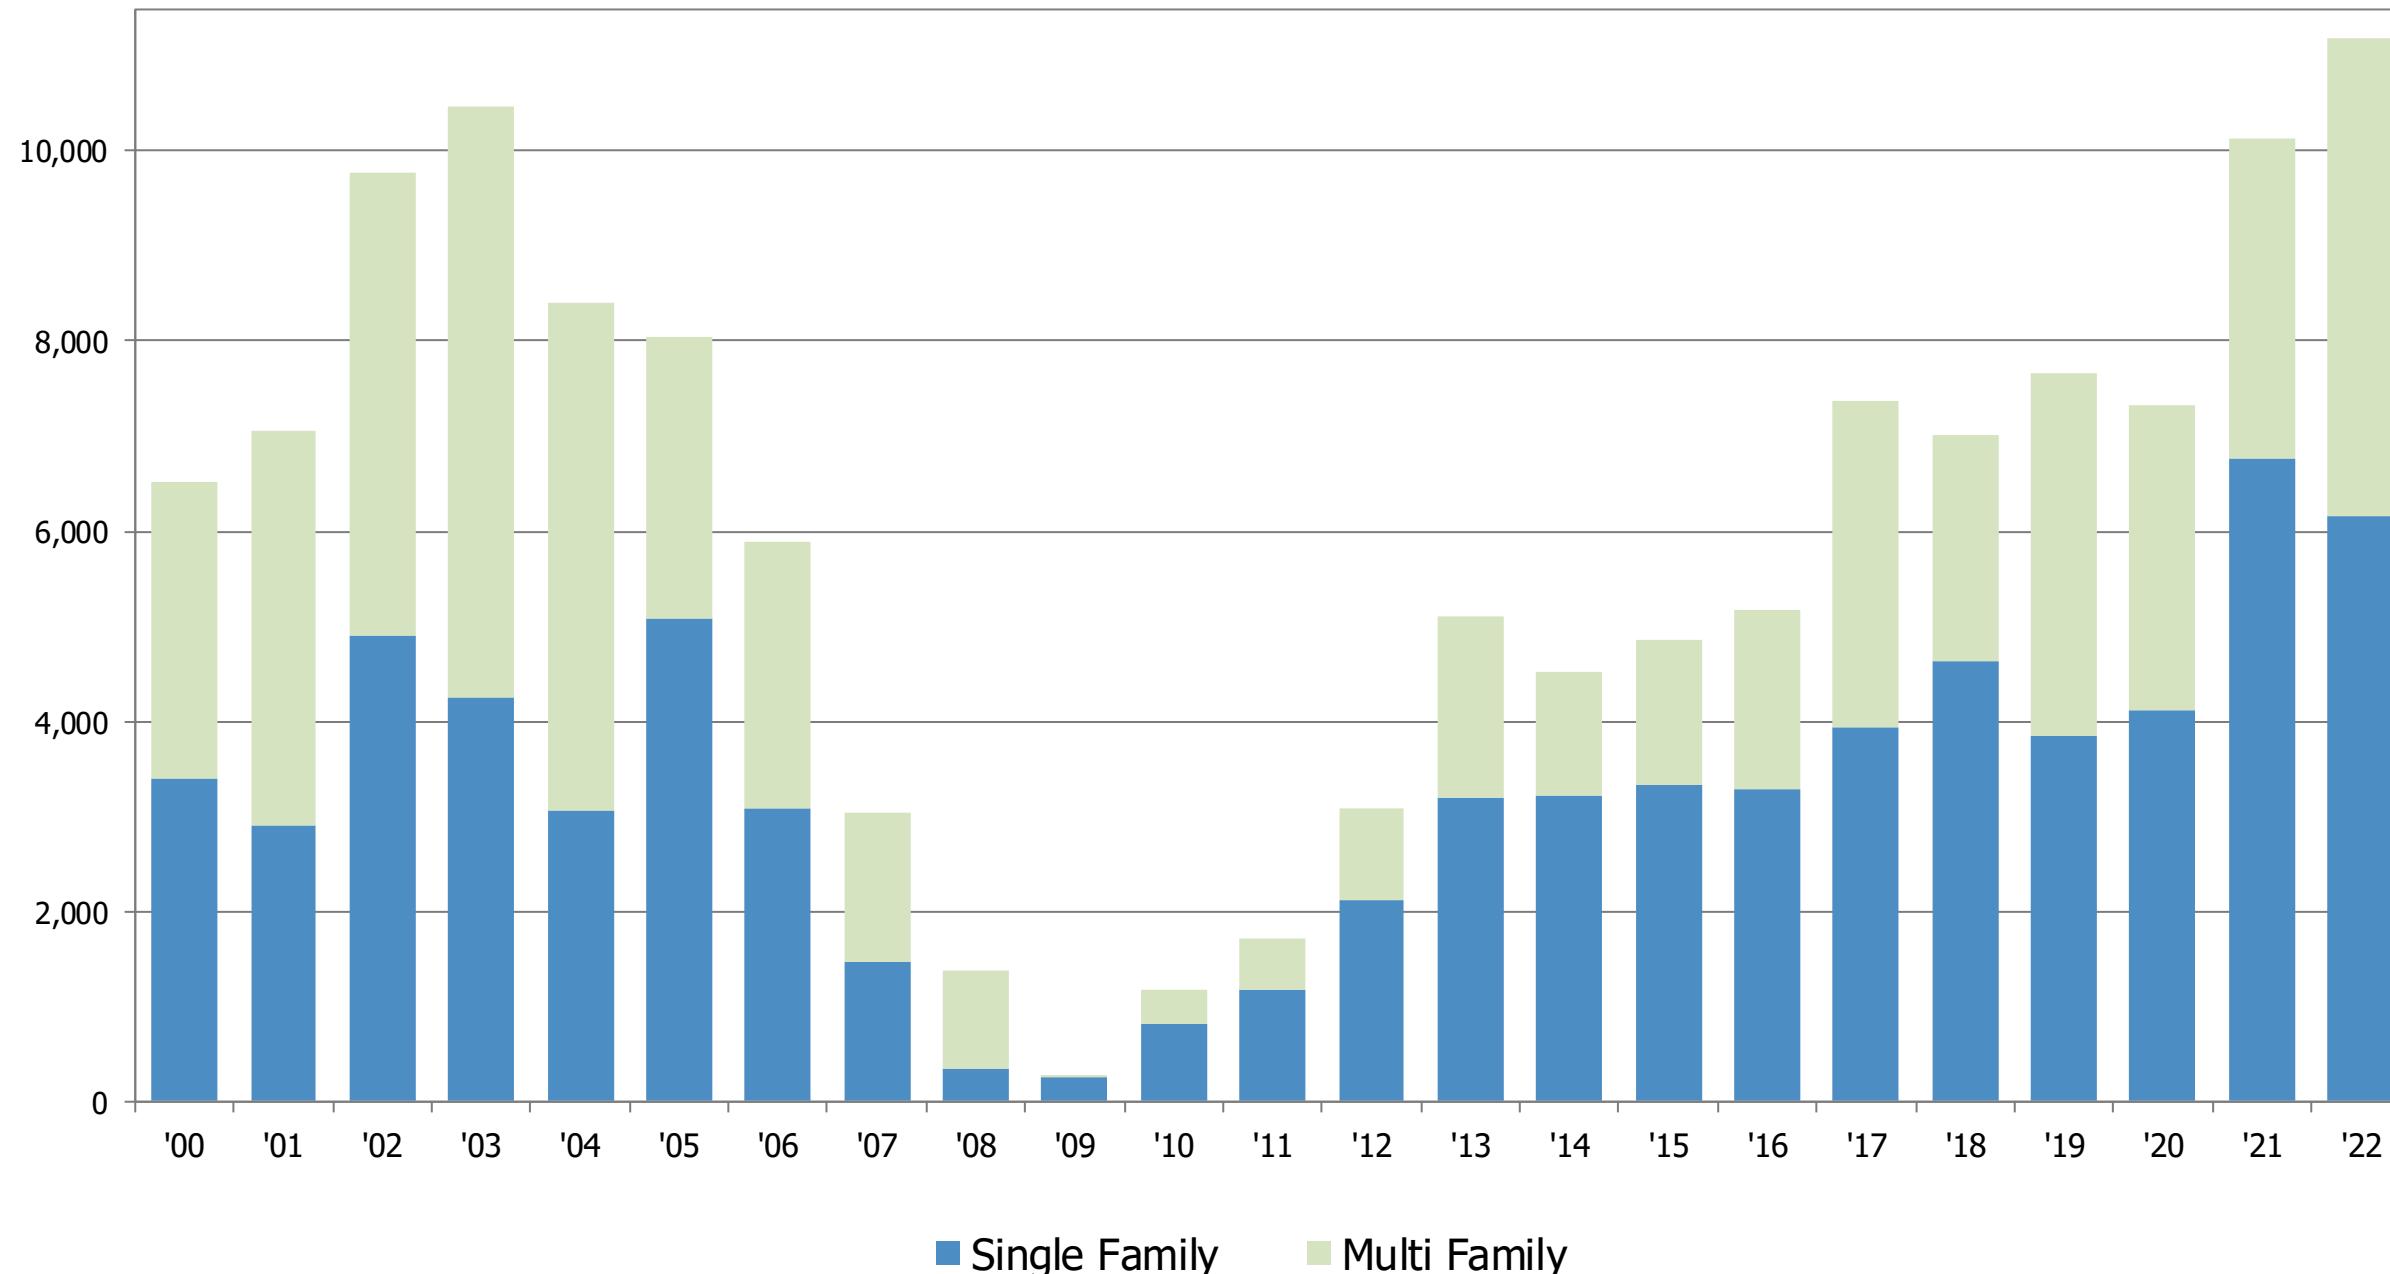

- Rural Center
  - Diversified Rural
  - Rural Residential
  - Agricultural

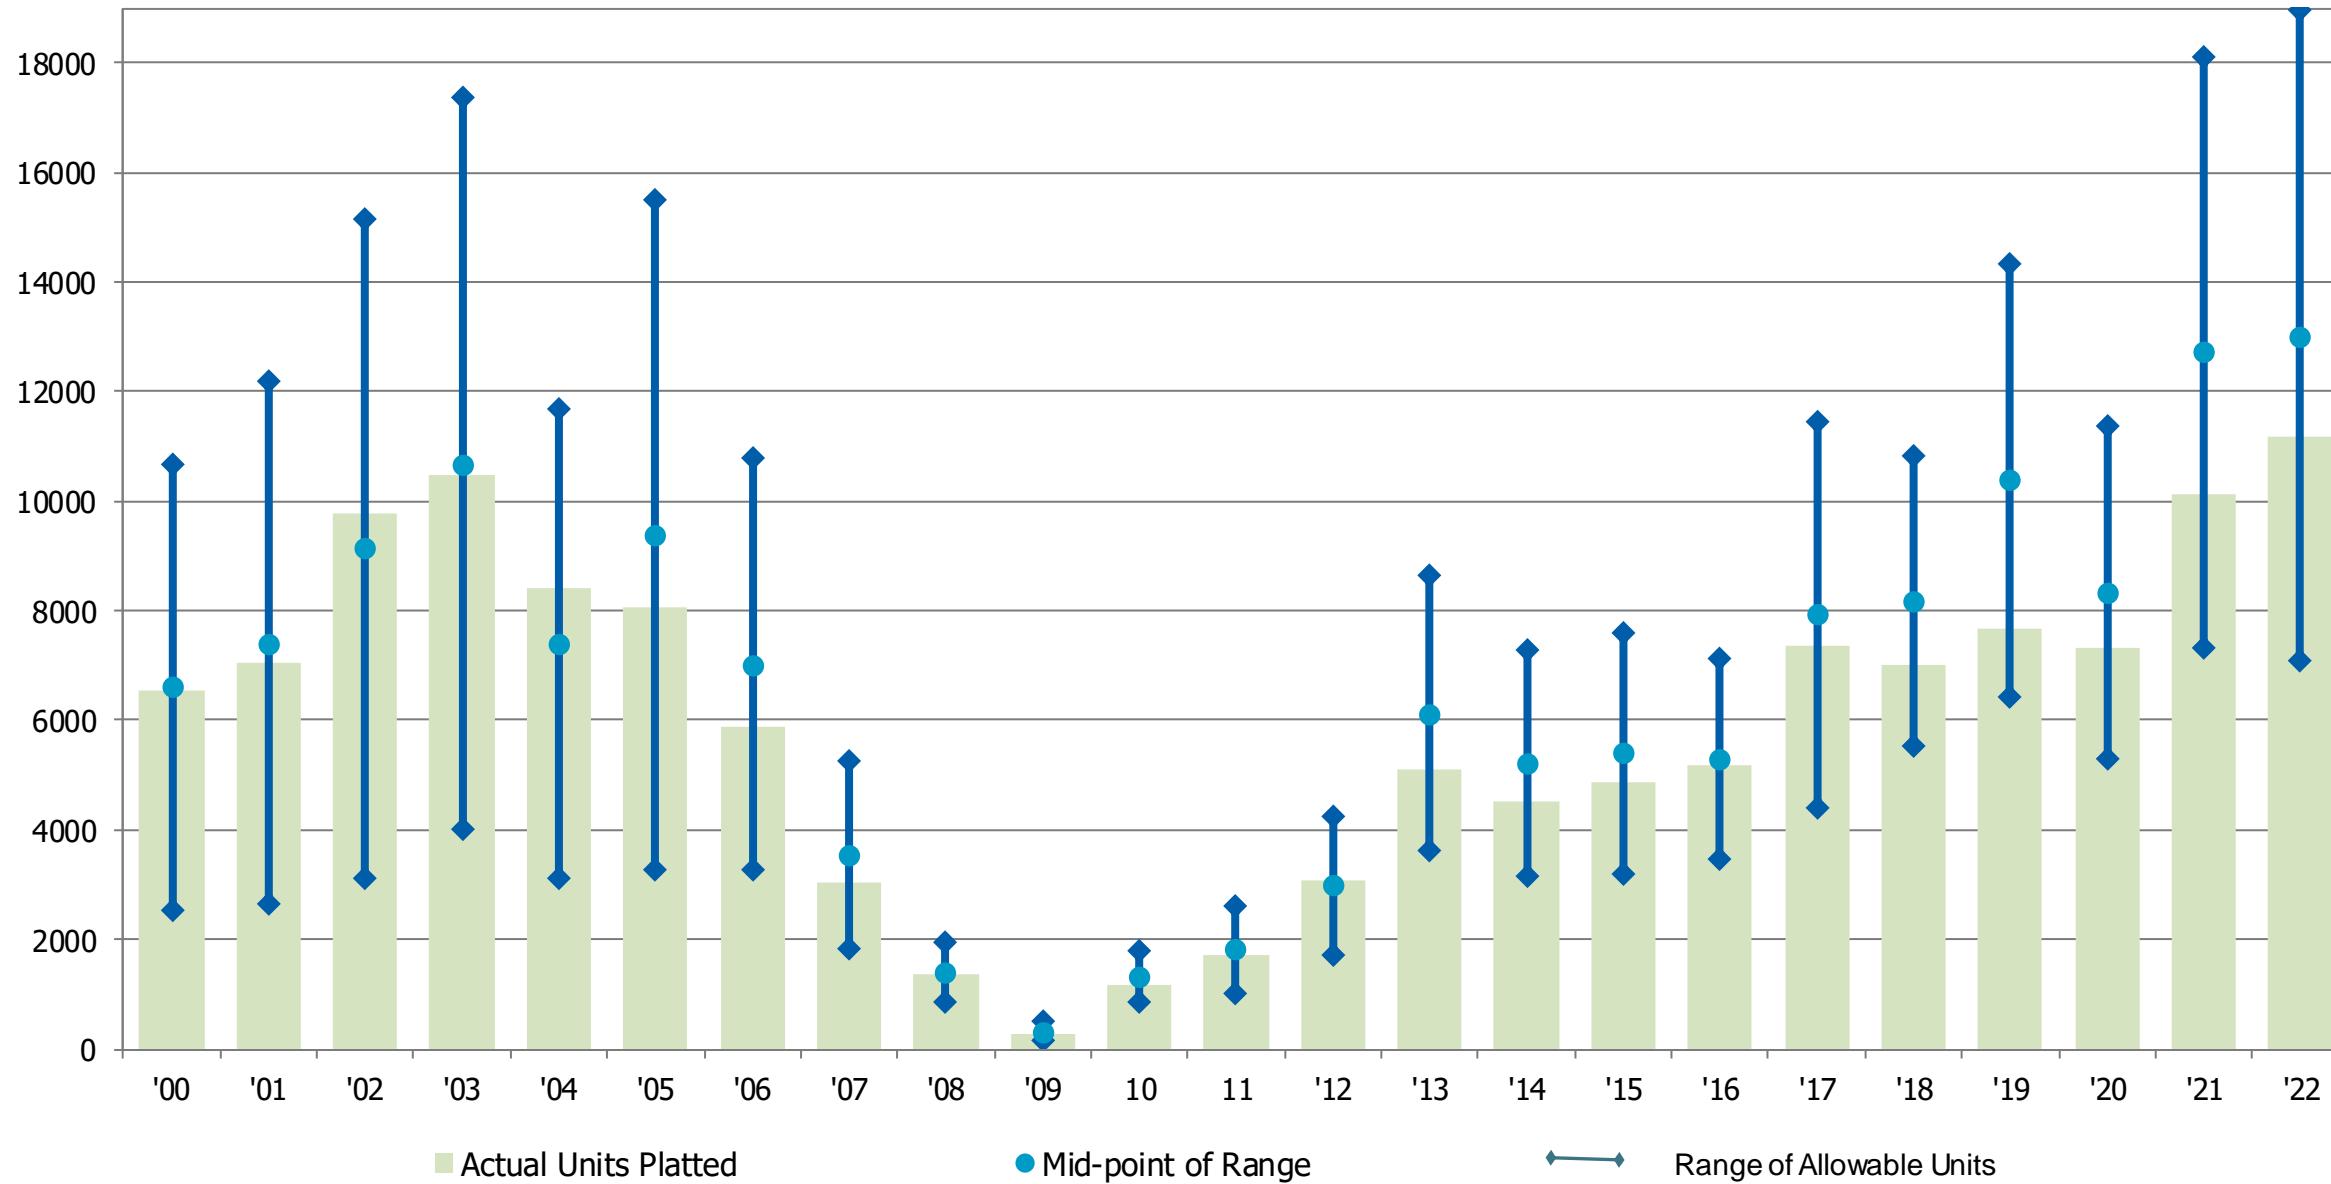

# Overall Platting Activity

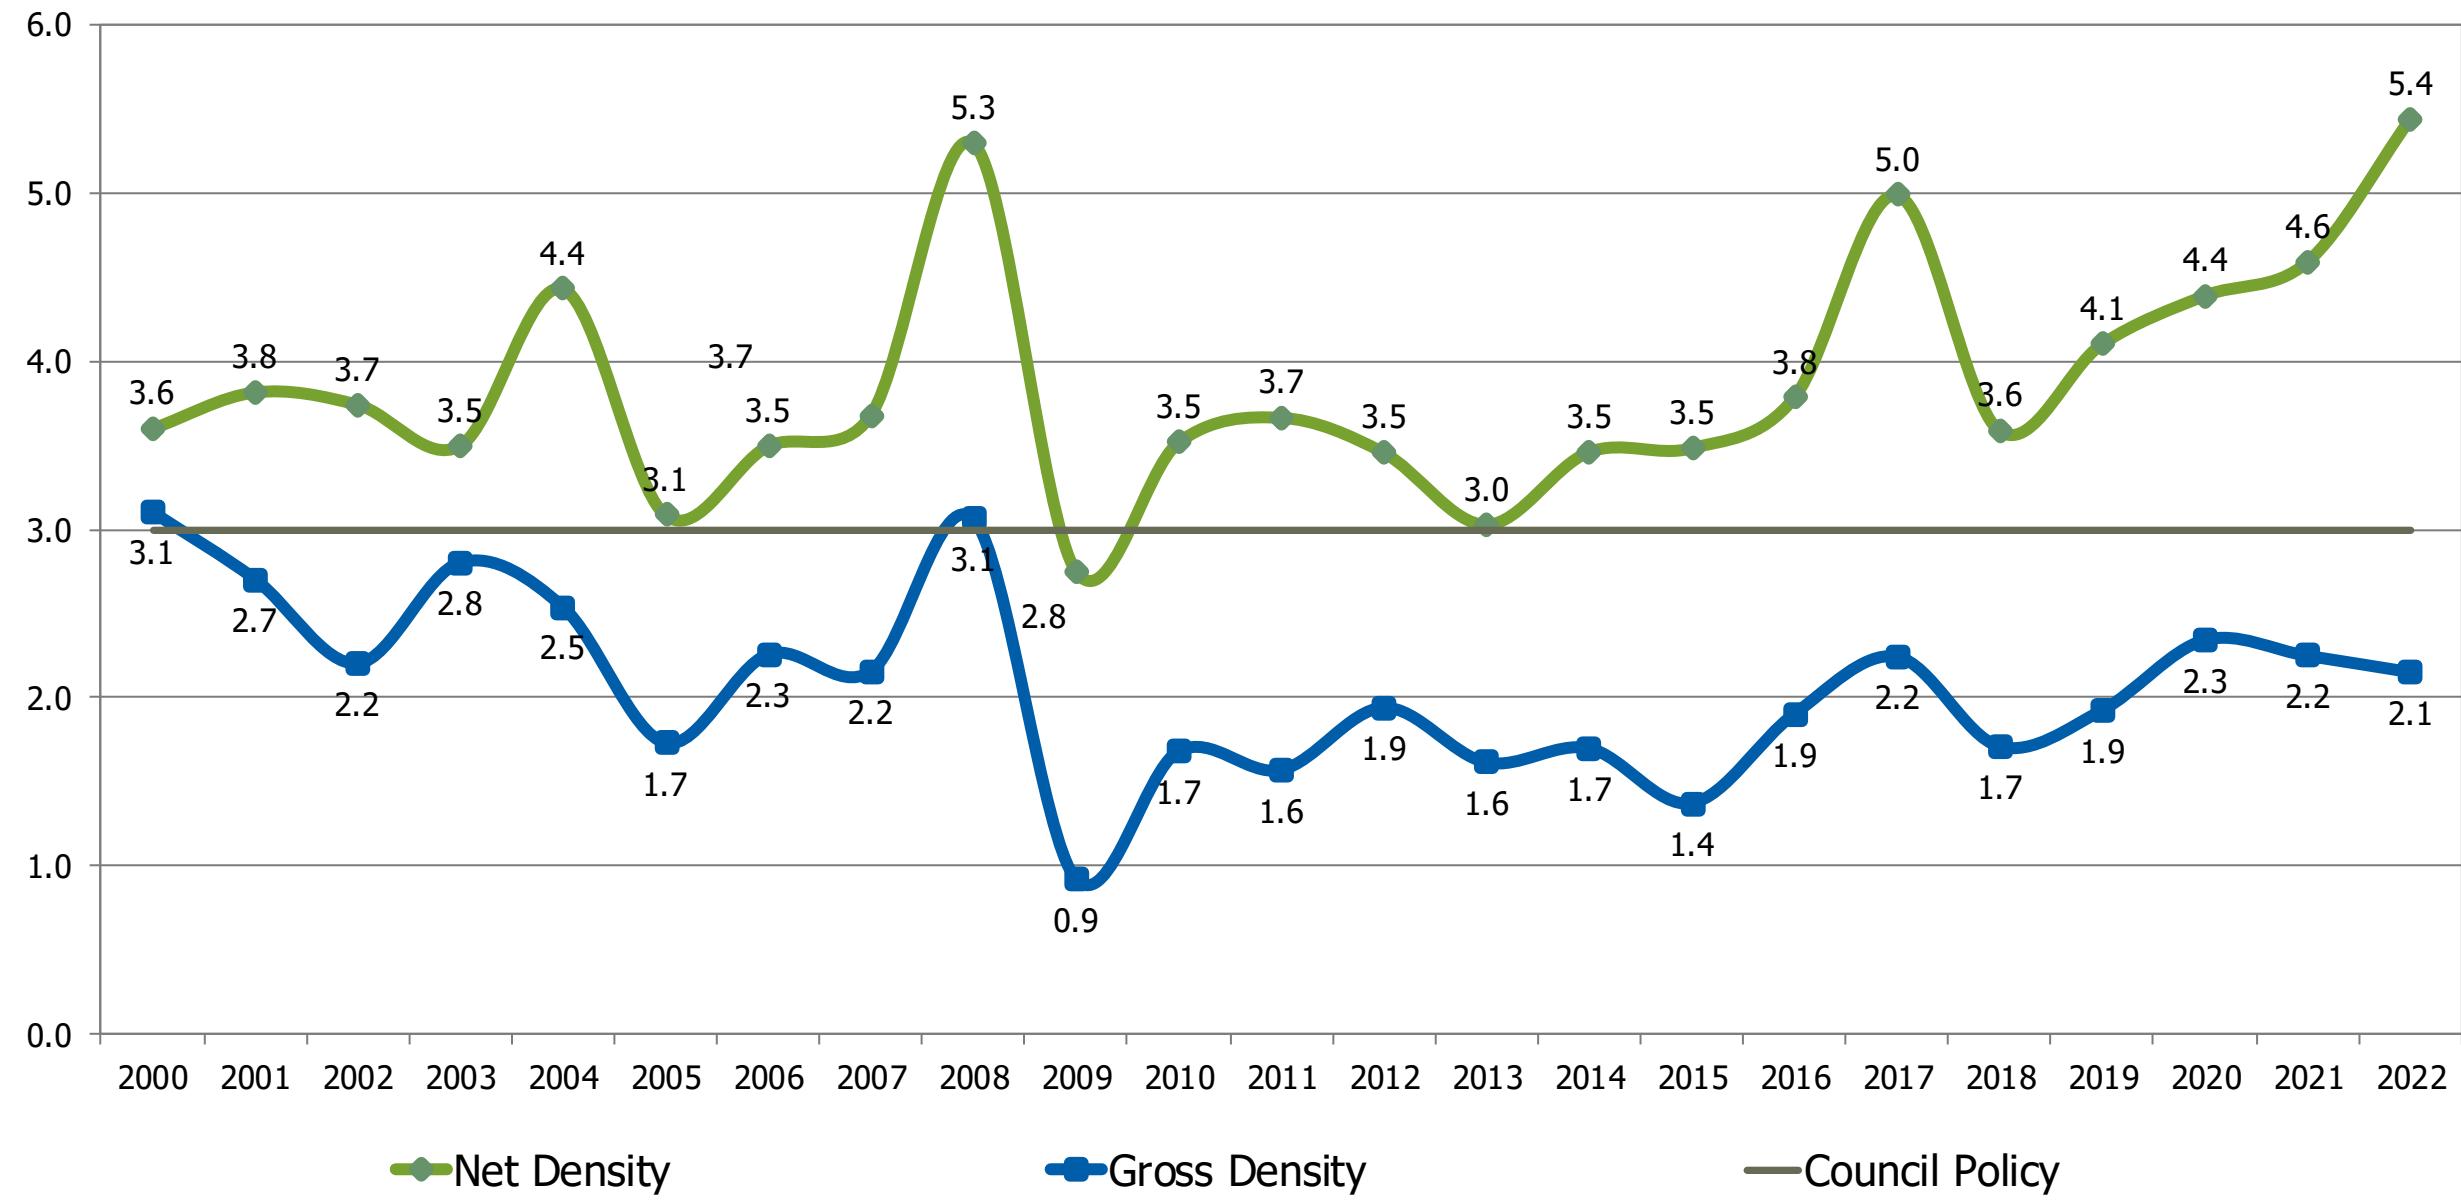

# Findings: Housing Mix

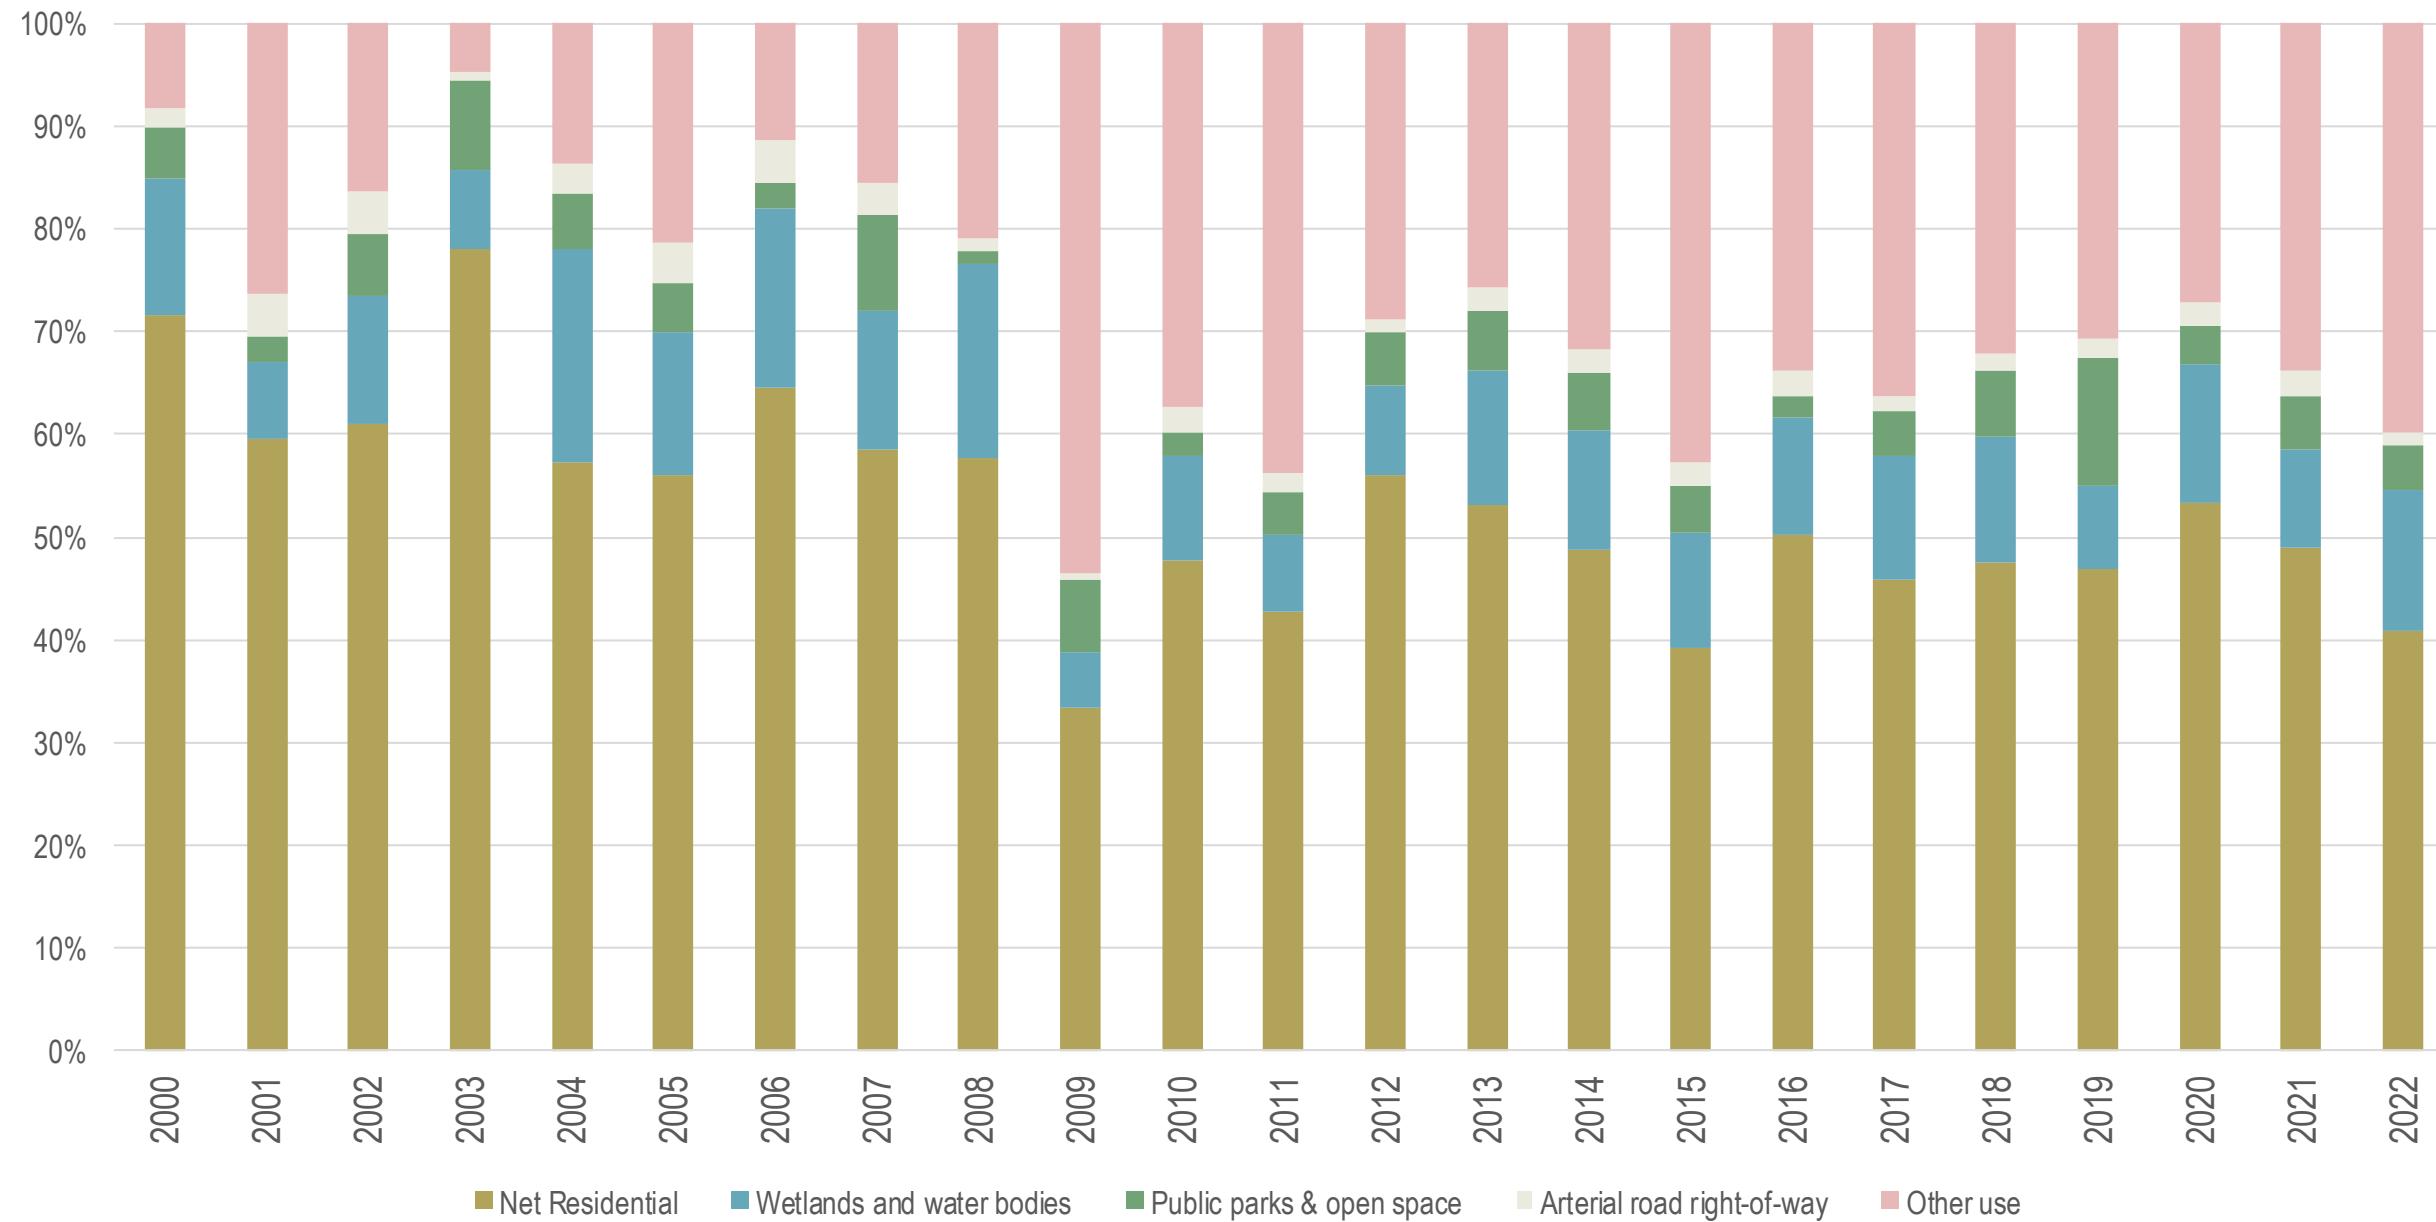

# Findings: Local Plans Consistency

# Findings: Overall Density

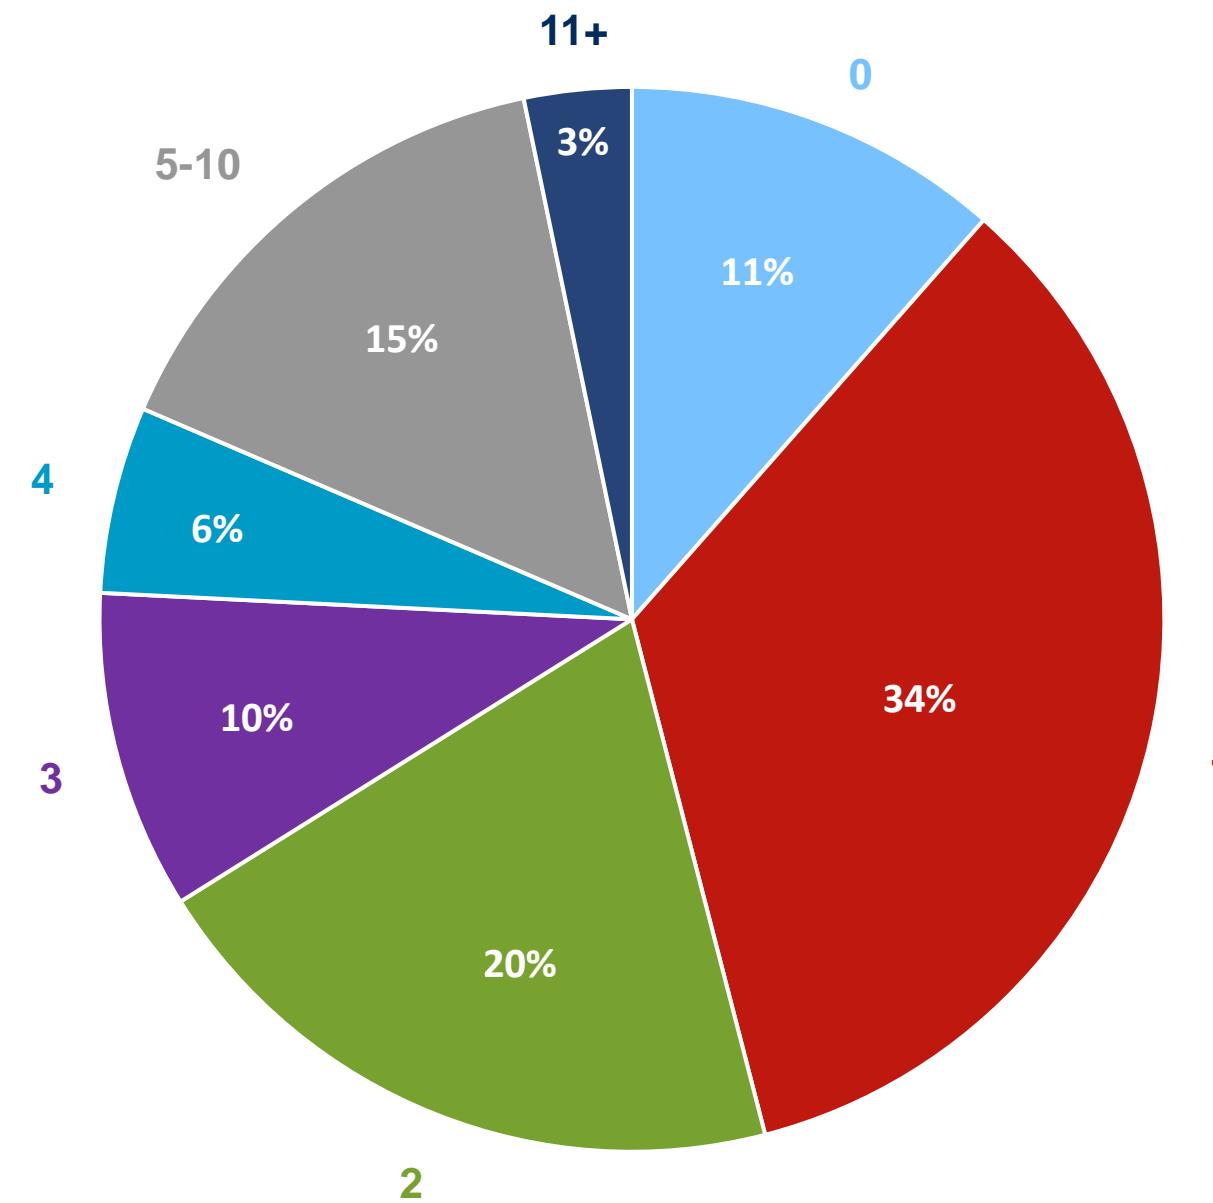

# Findings: Land Utilization

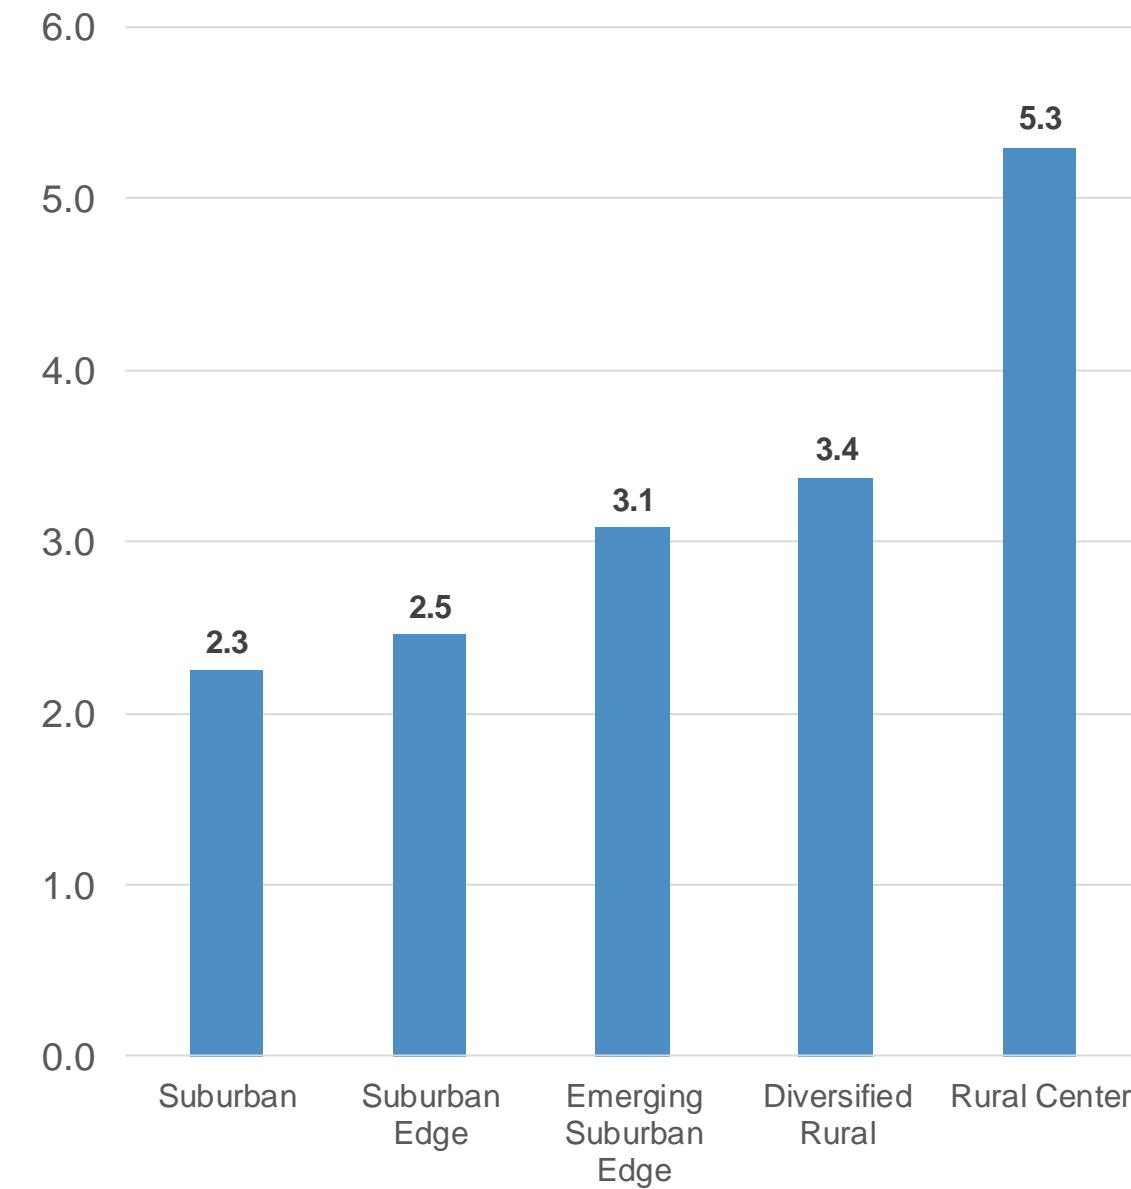

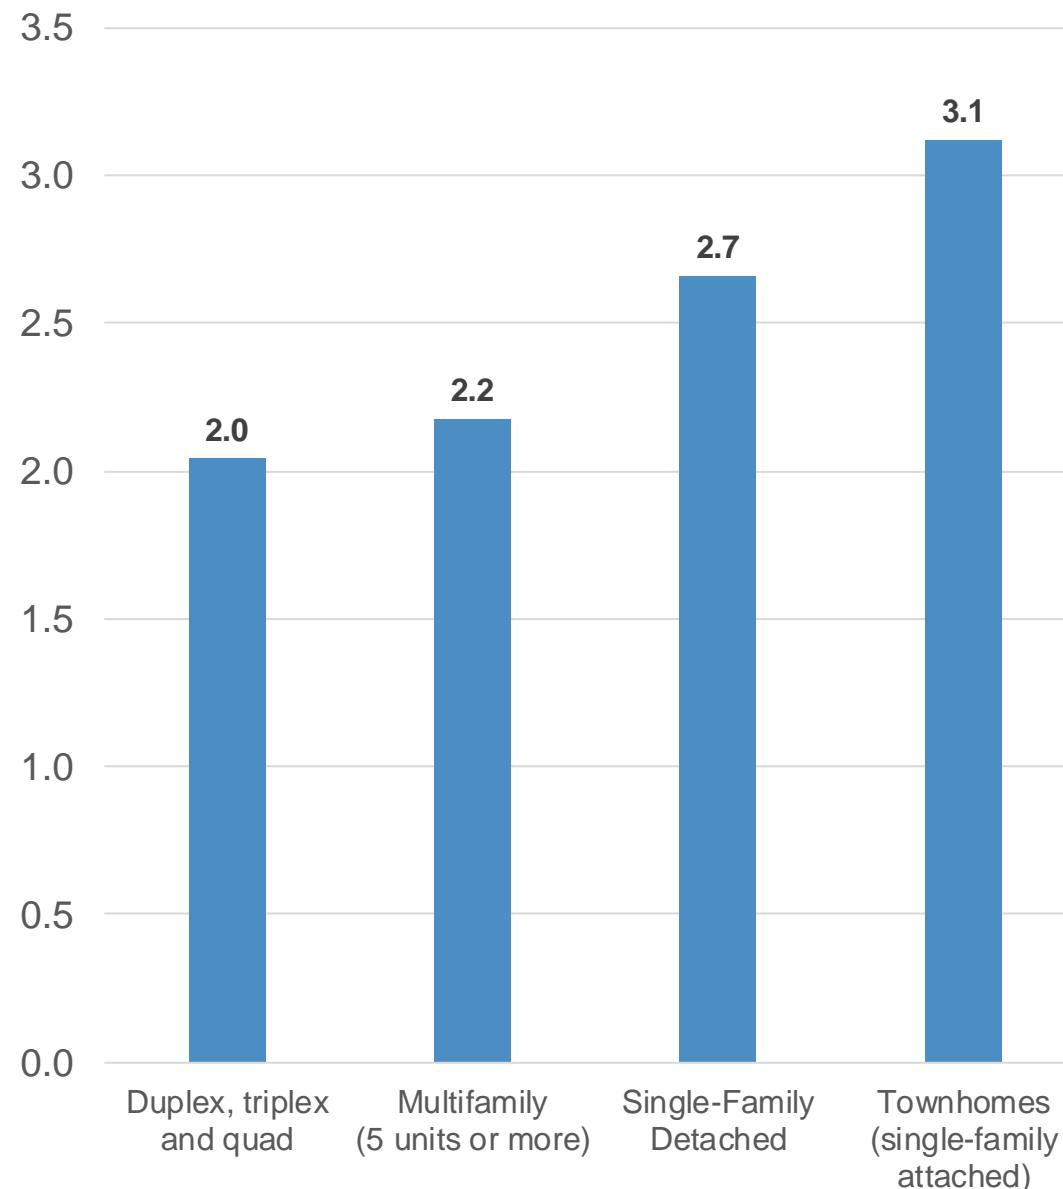

# Findings: Lot Absorption

- Lot absorption = amount of time from plat to permit
- Timeframe: 2009-2022
- Range: 0 to 20 years
- Varies based on economic stability, housing demand, etc.

# Findings: Lot Absorption

## Katelyn Champoux

Planner, Local Planning Assistance
