

The Mall Woonerf and Trail Connection 2024

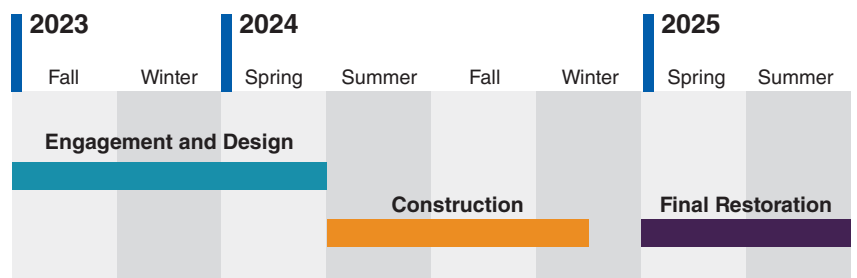

Minneapolis
Park & Recreation Board

Project overview

Metropolitan Council Environmental Services (MCES), operator of the metro area wastewater collection and treatment system, will replace the existing sewer pipes along The Mall between Bde Maka Ska Parkway E and Humboldt Avenue with new and larger pipes.

We will be working with the MPRB to replace parts of The Mall Park internal roadway according to their Southwest Service Area Master Plan. Turf/grass will be installed between Bde Maka Ska Parkway and Irving Avenue after construction is completed. A new woonerf (shared street) will be installed between Humboldt Avenue and Hennepin Avenue, along with a trail connection to the Midtown Greenway.

MPRB will hold two community meetings in late 2023 to obtain feedback from the community and park visitors regarding the trail route and amenities in the park area. Final design on these features will be completed in spring 2024. Construction work is tentatively scheduled to begin summer/fall 2024 and final restoration will continue through 2025.

Construction activities and schedules are subject to change due to weather and other unforeseen circumstances
