

# IMPROVEMENTS CONSTRUCTION UPDATE

## Truck hauling occurs Tuesday, March 5

Starting early on Tuesday, March 5, crews will begin hauling wastewater from the MCES wastewater pumping station (lift station) on Lilac Lane using large tanker trucks.

This hauling operation is needed to complete installation of the temporary wastewater conveyance system along North Shore Drive. Hauling will start in the morning and continue into the evening.

Example of a tanker truck

## What's coming up next?

- Crews will test and activate the temporary wastewater conveyance system.
- Pipe assessments and testing on the existing corroded pipe along North Shore Drive will occur in March.

**Reminder:** please take extra care when driving through the construction zone.
